;	* If	item 4 applie	es, some or all of those sheets may be marked "superseded."	

International application No.

PCT/CN03/01115

Box N	No. $\Pi$ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
This indu	questions whether the claimed invention appears to be novel, to involve an inventive step (to be non obvious), or to b strially applicable have not been examined in respect of:
	the entire international application
	claims Nos. 9
beca	ause:
	the said international application, or the said claims Nos.
	relate to the following subject matter which does not require an international preliminary examination(specify):  The invention set forth in Claim 9 relates to a method for treatment of the iman body by therapy.
	the description, claims or drawings (indicate particular elements below) or said claims Nos.  are so unclear that no meaningful opinion could be formed (specify):
	the claims, or said claims Nos are so inadequately supported by the description that no meaningful opinion could be formed.
	meaningful opinion could not be formed without the sequence listing; the applicant did not, within the prescribed time limit:  [furnish a sequence listing on paper complying with the standard provided for in Annex C of the Administrative Instructions, and such listing was not available to the International Preliminary Examining Authority in a form and manner acceptable to it.
	furnish a sequence listing in electronic form complying with the standard provided for in Annex C of the Administrative Instructions, and such listing was not available to the International Preliminary Examining Authority in a form and manner acceptable to it.  pay the required late furnishing fee for the furnishing of a sequence listing in response to an invitation under Rules 13ter.1(a) or (b) and 13ter.2.
Anı	eaningful opinion could not be formed without the tables related to the sequence listings; the applicant did not, within the scribed time limit, furnish such tables in electronic form complying with the technical requirements provided for in nex C-bis of the Administrative Instructions, and such tables were not available to the International Preliminary Examining nority in a form and manner acceptable to it.
the t	ables related to the nucleotide and/or amino acid sequence listing, if in electronic form only, do not comply with the nical requirements provided for in Annex C-bis of the Administrative Instructions.
See !	Supplemental Box for further details.

of promonent box		

International application No. PCT/CN03/01115

Box No. VIII Certain observations on the international applicati	Certain observations on the in	iternational applicatio
--	--------------------------------	-------------------------

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

Claims 1-3 relate to the glucagon-like peptide-1 receptor agonists, wherein the  $Ar_1$  and  $Ar_2$  groups were defined too broad, including an extremely large number of compounds. However, only a very small part of compounds claimed by claims 1-3 were supported by the description, such as the compounds wherein  $Ar_1$  was phenyl substituted by a thiophenylformyloxy group. Therefore, the claims 1-3 lack support, not meeting the criteria mentioned in Article 6 PCT.

#### **Supplemental Box**

In case the space in any of the preceding boxes is not sufficient.

Continuation of: Box No.V 2. Citations and explanations

2.1 The following documents have been cited herein:

Document 1: JP3-50532A

Document 2: JP9-244229A

Document 3: JP11-273865A

Document 4: Shafi, P. M. et al., "A new synthetic route to 4-arylidene-2-phenyl-2-imidazolin-5-ones", Indian J. Chem., Sect. B:Org. Chem. Incl. Med. Chem., 1999, 38B(3), p378-379

Document 5: Agarwal, Rajesh et al., "Synthesis of 2-aryl-1-(4-morpholinophenyl)-4-(3,4-disubstituted-benzylidene)imidazolin-5-ones as CNS active agents", Indian J. Chem., Sect. B, 1983, 22B(3), p308-310

Document 6: Follenius-Wund, Anny et al., "Fluorescent derivatives of the GFP chromophore give a new insight into the GFP fluorescence process", Biophysical Journal, 2003, 85(3), p1839-1850

Document 7: WO03050098A

Document 8: Chemical Abstracts, CAN: 134:115892, "Synthesis of 1,2,4-trisubstituted 2-imidazolin-5-ones", CAS RN: 52900-70-6

Document 9: Chemical Abstracts, CAN: 132:265133, "A convenient synthesis of 4-arylidene-2-phenyl-5-oxazolones catalyzed by KF-Alumina.", CAS RN: 14326-80-8

#### 2.2 Novelty:

In Document 1, compounds such as No. 1-3 and 6-8 (see the specification p3 table 1) fall in the scope described in Claim 1. Moreover, compounds such as No. 17, 18 and 22 (see D2, the specification p8-9), compounds disclosed in table 1 (see D3, the specification p 5) and compounds disclosed in table 1 (see D4) fall in the scope described in Claim 1. Thus, the subject matter of claim 1 is not novel and doesn't meet the criteria of novelty set out in PCT Article 33(2). Document 5 disclosed a compound represented by formula (III), which fall in the scopes described in Claims 1-3, and the preparation described in Claims 4 and 6-7. Thus, the subject matters of claims 1-4 and 6-7 are not novel and don't meet the criteria of novelty set out in PCT Article 33(2).

Furthermore, compounds such as I-3, I-11, I-15, I-17, I-19, I-20 and I-21 disclosed in Documents 6 and compounds disclosed in Documents 8-9 (CAS RN: 52900-70-6 and CAS RN: 14326-80-8) also destroy the novelty of Claims 1-2.

Since the subject matter of claims 5 and 8 are different from the disclosure of Document 1-9, claims 5 and 8 are novel.

#### 2.3 Inventive step

Since claims 1-4 (part) and 6-7 (part) are not novel, the subject matter of claims 1-4 (part) and 6-7 (part) don't meet the criteria of inventive step set out in PCT Article 33(3).

International application No.

PCT/CN03/01115

#### Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box No.V 2. Citations and explanations

D5 seems to represent the closest prior art to claim 5 and 8 (part). Considering of the teaching of D5 and general knowledge of a person skilled in the art, the person skilled in the art could easily reach the subject matters of claims 5 and 8 (part). Therefore, Claims 5 and 8 (part) are obvious and don't meet the criteria of inventive step set out in PCT Article 33(3).

D1-6 and 8-9 disclosed a part of compounds described in Claim 1, and did not provide any indication that those compounds were useful in the treatment of diseases such as Type 2 diabetes. D7 disclosed many compounds useful in the treatment of above diseases, but the structures were different from the compounds described in Claim 1. Therefore, if above compounds disclosed in D1-6 and 8-9 are disclaimed from Claim 1, the subject matter of claim1 (part) is not obvious from the disclosure in above documents. Thus, Claim1 (part) meet the criteria of inventive step set out in PCT Article 33(3). Accordingly, Claims 2-8 (part) meet the criteria of inventive step set out in PCT Article 33(3).

#### 2.4 Industrial applicability:

Claims 1-8 meet the criteria of Industrial applicability set out in PCT Article 33(4).
